

Question 7

```
SELECT City || "----" || Application || " --- " || Status AS "Status2", COUNT(*)
FROM LEADS WHERE State = "MA" and
City IN
( SELECT CITY FROM LEADS WHERE State = "MA" AND City = "Worcester")
GROUP BY Status2
HAVING Status NOT IN ("Not Automated")
ORDER BY Status2, COUNT(*)
LIMIT 10;
```

```
sqlite> SELECT City || "----" || Application || " --- " || Status AS "Status2", COUNT(*)
...> FROM LEADS WHERE State = "MA" and
...> City IN
...> ( SELECT CITY FROM LEADS WHERE State = "MA" AND City = "Worcester")
...> GROUP BY Status2
...> HAVING Status NOT IN ("Not Automated")
...> ORDER BY Status2, COUNT(*)
...> LIMIT 10;
