Milestone 2 : Project dataset updated

Top 10000 Popular Movies Dataset
https://www.kaggle.com/datasets/omkarborikar/top-10000-popular-movies

Column Name	Description
id	Every movie has its unique ID.
original_language	There are total 44 languages present in this column. Total 7771 movies with 'English' as original language. Values in this column are ISO 639-1 codes of languages. I.e 'en' for 'English' , 'hi' for 'Hindi' etc.
original_title	Title of the movie.
popularity	Popularity of movie. Bigger the number , higher the popularity.
release_date	Release date of the movie. If release date is not present for any movie , then that movie is not released yet.
vote_average	Average of rating/vote for the movie.
vote_count	Number of ratings/vote recorded for the movie.
genre	Genre of the movie.
overview	Brief description of movie in string format.
revenue	Revenue of Movie

Column Name	Description
runtime	Runtime of movie in minutes.
tagline	Tagline of the movie

I am planning to use primary columns and will be discarding the un-necessary columns which I feel, that won't play an important role as other columns.

Discarding column : overview and tagline
